

WORKING TOGETHER

The Waimakariri Ecological & Landscape Restoration Alliance Inc (WELRA) acknowledges the many financial and volunteer contributions that are supporting the control and eventual removal of wilding pines within the Upper Waimakariri Basin.

ALL donations, grants and volunteer work, whatever the amount, contributes significantly to the wilding pine removal programme. Along with work the volunteers are doing, we are able to contract professional gangs and helicopters to make a significant impact on the wilding spread.

Without the generous financial and volunteer contributions of the many people and organisations supporting the WELRA effort, the wilding threat will continue to invade and smother the natural environment and obliterate iconic landscapes throughout our mountains, parks, high country farms and reserves.

WELRA appreciates the valuable contributions given by: -
